The principle for this patch is when you place fields of Carbon (C), Hydrogen(H) and Oxygen (O) in plasmatic form they link with our main reactor which is our brain.

So it goes all through the body as it needs by demand because the brain distributes it directly through the link in nose which is connected with emotional part of the body.

Gadget 4: How to Make?

1. Cut a strip of tape large the same as the nose.
2. Cut another strip a little bit longer
3. Apply on the 1st tape strip few dried Gans over its length on the sticky side.

Other Simple Options:

Gadget 4: How to Make?

You can use coils as well

Gadget 4: How to Make?

4. Close putting the longer piece over the shorter piece of tape putting the two sticky side in touch.
5. Apply over the nose or the area needs to be processed.

Same method can be use to heal wounds, putting in between the two strips a spiral nano coated copper alone or dry gans with spiral nano coated copper.

Maybe it can be more effective, directly over the wound. Obviously the tape has to be in proportion of the wound
